2022	14	18.50	19.50	2.17	13.00	20.00
Total	139	18.82	20.00	2.03	11.00	20.00

Layman's Conclusion:

There were a total of 139 Dedicato clients that completed the center's intervention and rehabilitation program and subsequently measured their satisfaction and outcome results between the years of 2017 to 2022. The results have shown that the participant's self-reported average admission process scores after the treatment program have had an increasing trend in each of the last preceding four years before slightly dipping in 2021 of about 1.1% this latest result was not significant, meaning the decrease in average client admission process was not different from previous years.

In 2022, there was a slight decrease in average client admission score by approximately 2.0% from the previous year and not statistically significant across the six time periods. Overall, the result of the six-year period saw an increasing trend and within the center's benchmark of good client admission process practice and therefore, the latest result was consistent in providing excellent services in the client's admission process experience.
